HARSH VIJAY SINGH KALSI

SUMMARY

AI-focused Computer Science (AI/ML) undergraduate with leadership experience as a Founder and Co-Founder, building AI-first and full-stack systems. Proficient in Python, C++, and SQL, with hands-on expertise in machine learning, data science, and LLM engineering. Experienced in developing intelligent systems using computer vision, NLP, and real-time processing. Strong in product development, project management, and executing in fast-paced startup environments.

EXPERIENCE

Co-Founder, **07/2025 - Current**
Fassionate - Chandigarh, India

- Built an early-stage fashion platform focused on outfit sharing, peer feedback, and identity-based discovery.
- Designed an event-driven backend with taste-learning, matching, and feed ranking using cosine similarity.
- Developed APIs for core flows including posting, reactions, onboarding, and discovery.
- Led product iteration through PRDs and user-driven feature refinement.

Freelance Programming, **06/2019 - Current**
Self - Chandigarh, India

- Delivered end-to-end solutions across Python, AI/ML, data science, and Django.
- Built scalable systems including automation tools, MySQL applications, and C++/Pygame software.
- Developed ML models and data pipelines using Python and R.
- Leveraged AI tools and prompt engineering to enhance development.
- Managed multiple projects from requirements to deployment.

Founder, **01/2023 - 09/2024**
TherapAI - Chandigarh, India

- Built an AI-driven therapy system using OpenCV, NLP, and biosensors for real-time emotion detection.
- Developed multimodal pipelines combining facial, vocal, and physiological signals.
- Designed data fusion workflows to generate actionable emotional insights.
- Implemented adaptive feedback systems to regulate mood via music and lighting.

CONTACT

Address: Chandigarh, India 140413
Phone: 8569819403

SKILLS

- **Languages:** Python, C++
- **AI/ML:** Machine Learning, Data Science, LLM Engineering
- **Tools:** SQL (MySQL), Claude, Apache Kafka, Apache Spark, Anaconda, Jupyter Notebook
- **Entrepreneurship:** AI-First Prototyping, Product Management, Software Development

PROJECTS

Multimodal Emotion Recognition System

- Built a real-time multimodal AI system (CV, NLP, sensors) with

- Improved system performance through iterative testing and calibration.

EDUCATION

Bachelor Of Engineering(Hons.) Computer Science Engineering (AI/ML specialization), **2026**
Chandigarh University - Mohali, IN-PB

- Finalist in national hackathons including TATA Ideathon, KPIT Sparkle, Vihaan 6.0, and PEC AI Hackathon.
- Core member at Technology Business Incubator, engaging with angel investors and startup ecosystem.
- Contributed to AI research and Brain-Computer Interaction at Kalpana Chawla Space Centre; IEEE member.
- Core member in coding communities (IdeateX, GeexPro), participating in tech events and collaborations.

PCM with CS and PE, **2021**
Army Public School, Chandimandir - Chandimandir Cantonment, Panchkula

- 10th Boards – 93%
- 12th Boards – 92%
- Part of Indo-Bangla Military Cultural Delegation: Was a member of the delegation team that went to Bangladesh Military Schools for a cultural visit

improved prediction via data fusion.

AI Automation & Data Systems

- Developed automation pipelines and data workflows optimized for performance.

Personal Experimental Designs

- Created experimental projects including black hole simulation (C++) and Pygame applications.

ACCOMPLISHMENTS

Football (State Level), Basketball (District Level), Modelling, Guitarist and Singer, Debate Team Captain, Vice Head Boy, MUN DISEC Delegation
